Leverage industry-specific functionality unavailable in traditional ERP software. Shorten your time to full system deployment, bypassing expensive, lengthy customizations. Available exclusively from Tensoft, Microsoft Dynamics GP Semiconductor Industry Edition is an off-the-shelf, industry solution of Microsoft's award winning business management software.

Gain Insight from Semiconductor Industry Experts

Spend less time customizing and explaining your needs to non-industry consultants. Tensoft's consulting organization delivers a turnkey semiconductor solution to support financial models such as buy/sell agreements, transfer pricing, foreign trade zones and complex royalties.

Streamline Business Processes

Integrating important business processes avoids silos of conflicting or unavailable information. Quote to cash and production plan to vendor payment processes are fully integrated, supporting better controls and better company-wide team utilization.

Broaden Visibility

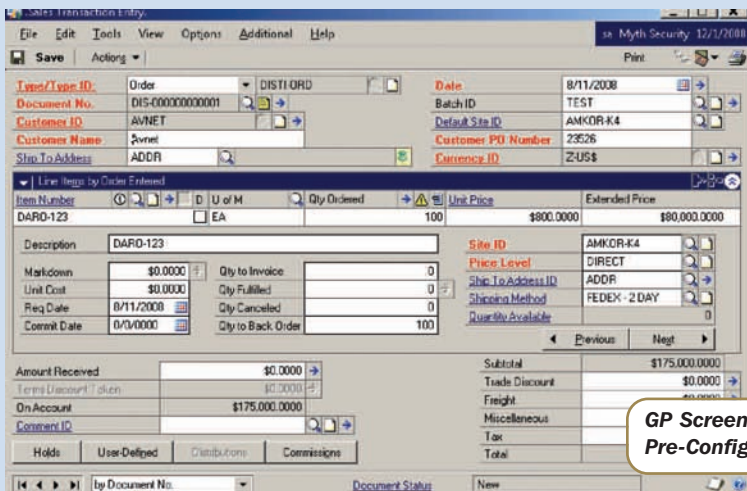

Integrated processes improve the velocity of information exchange across the enterprise. Functionality to capture the right data for this industry improves your ability to understand and manage.

Improve Productivity

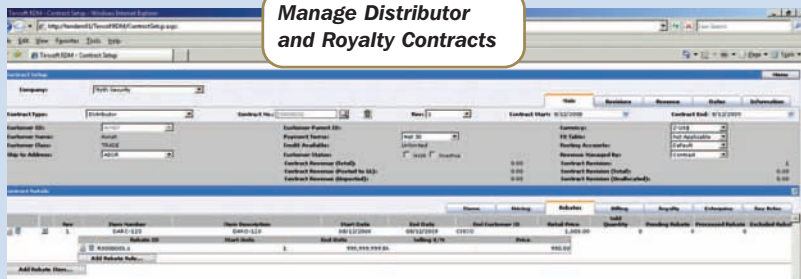

Eliminate spreadsheet work-arounds for sales, revenue, distributor management, dashboards, multi-national operations and inventory valuation analysis. Improve team productivity with software that produces answers rather than questions.

Ensure Compliance

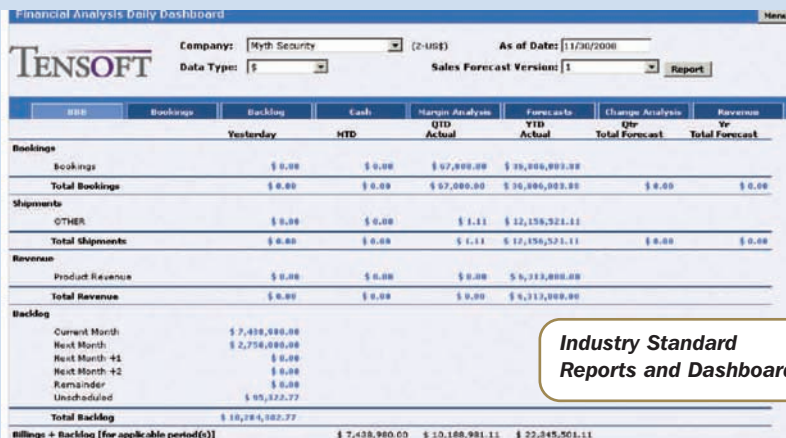

Shorten audits with complete transaction history, detailed reporting and controlled, compliant processes.

- ✓ TENSOFTE FABLESS SEMICONDUCTOR MANAGEMENT
- ✓ TENSOFTE SEMICONDUCTOR RELATIONSHIP MANAGEMENT

FEATURES OVERVIEW

<i>Financial and Cash Management</i>	Seamlessly integrates general ledger, analytical accounting, fixed assets, intercompany, bank reconciliations, payables and receivables management, EFT and more.
<i>Multi-National Operations and Consolidation</i>	Facilitates multicurrency transactions, translation and valuation, CTA impact calculation, historical rate maintenance, unlimited reconsolidations, local entity support as well as FASB 52 compliance.
<i>Revenue Management for Distributor Sales</i>	Includes high-level distributor agreement management tools including rules-based deferred revenue, point of sale (POS) uploads, ship and debit (rebate) management and distributor data analysis.
<i>Sarbanes-Oxley Compliance</i>	Simplifies regulatory compliance with screen-, account- and field-level security, system audit trails, electronic signatures and single sign-on through Active Directory.
<i>Workflow Control</i>	Includes configurable and hierarchical electronic system workflows, routing approvals and notifications online or through email.
<i>Sales and Purchasing Management</i>	Invoicing, sales order processing, order management, online requisitions, and purchase order processing are all tightly integrated with other key processes and departments.
<i>Workforce Management</i>	Tools include a fully featured human resources suite as well as payroll, employee self-service, time and expense management.
<i>High-Tech Dashboard</i>	Easily view bookings/billings/backlog management, margin analysis, cash requirements, forecasting and other industry metrics.
<i>Business Intelligence and Reporting</i>	Streamlined reporting includes financial budgeting, cash flow forecasting, key performance indicators, flexible reporting and analysis tools.
<i>Collaboration Tools</i>	Features native integration with Microsoft Office applications and the web-based, SharePoint portal to empower employees, customers and partners with secure access to applications and collaborative information.
<i>Integrate to other Tensoft Applications</i>	Unite sales, marketing and operations by implementing Tensoft's Fabless Semiconductor Management (FSM) and Semiconductor Relationship Management (SRM) applications for an end-to-end solution.
